

## Automatic Centrifugal Basket Mill, Type: ACBM

<http://www.jegerings.com/en/>

## General

The Basket mill ACBM with three centrifugal baskets can be placed behind a vegetable washing machine. The machine is completely made of stainless steel for perfect hygiene and longevity.

[Video processing line for small to medium capacity](#)

## Operation

The empty baskets are placed in the basket mill. An optical sensor detects that the basket is full. Then the basket mill automatically turns to the next position with an empty basket. The full basket of vegetables can be placed in the centrifugal vegetable drying machine. If the basket mill automatically turns to an empty basket, the vegetables falling from the conveyor belt are stopped by the feed hopper with rubber scraper and fall onto the top, after which, when the basket mill is turned, they automatically fall into the next empty basket.

## Technical data and dimensional diagram

**Dimensions:** WxDxH = 1550 x 1400 x 1700 mm.

**Electrical data:** 1 Ph./230 V./1.1 A.

**Machine weight:** 190 kg.

**Capacity:** 4 baskets per minute.

The dimensional diagram of the ACBM is shown on page 3.

## Prices

Basket mill ACBM:

on request

**Delivery time:** stock - 4 weeks.

**Delivery:** ex. works Deurne – the Netherlands. Packaging and transportation excluded.

**Warranty:** 1 year. Outside the Netherlands only on spare parts.
