

Knife Peeling Machine, Model: MSM-20

<https://www.jegerings.com/en/>

Benefits

- All stainless steel knife-peeling machine for peeling potatoes, root celery, kohlrabi etc.
- Thanks to the exact adjustment of the knives and the hygienic rubber skin inside the drum, the end product is beautifully and smoothly peeled, with a minimum of peel losses and bruises.
- Removable peeling disc with 15 long and 15 short peeling knives. The peeling disc is made of stainless steel with milled knife cavities. On the peeling disc are three very solid turning-rubbers which turn the product during the rotating action of the peeling disc.

- The construction is compact and has a motor which is completely inside the machine. The legs make it possible to clean the floor underneath the machine. The dismantlable legs can be sized conform your preferences, before delivery of the machine.
- Exceptionally nice and solid finish. Containing a plastic electrical enclosure within a stainless steel enclosure, thus optimally protected against water.

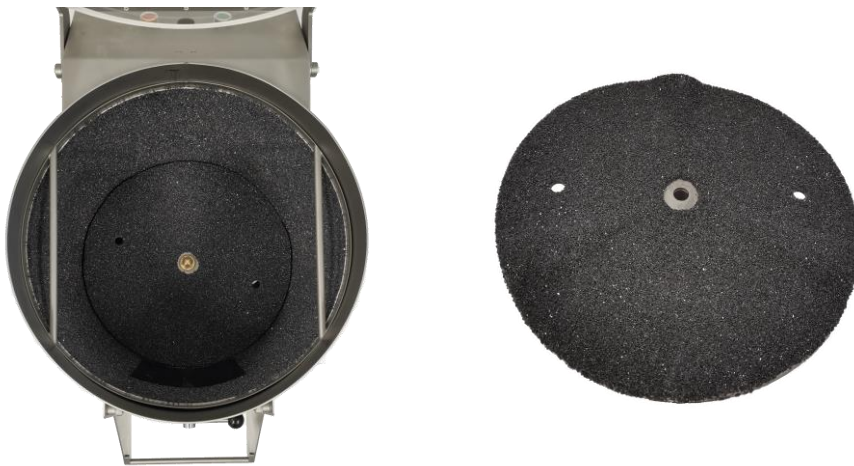

- Complies with the latest safety standards of machinery. Containing a secured cover and emergency stop relay.

Optional

- Pneumatic door control, necessary if used in an automatic production line.
- Can also be used with carborundum coated peeling disc.

Technical data and drawings

Dimensions: All heights with standard leg-height.

LxWxH: 595 x 750 x 1050 mm

Height of entrance: 990 mm

Height of exit: 500 mm

Electrical data: 3 Ph / 400 V / 50 Hz / 1.1 kW / 2.7 A / N2 = 205 RPM

Weight: 125 kg

Capacity: 15 – 20 kg /cycle

Cycle time: 1 – 5 min.

The drawings of the MSM-20 are listed on page 4.

Prices
